

# Experience the True Meaning of Electronic Document Distribution.

- ✂ **Powerful new add-on to eCopy Desktop.**
- ✂ **Scan documents directly to multiple recipients.**
- ✂ **Receive instant notification.**
- ✂ **Both audio and visual alerts.**
- ✂ **Eliminate extra steps.**
- ✂ **Streamline workflow.**

Simply place a document on the scanner and send it **directly to multiple** eCopy Desktop folders. Desktop Mailman™ will instantly notify all recipients that the document has been received.

This powerful new add-on feature streamlines the eCopy workflow by removing extra steps. Without Desktop Mailman™, the sender must manually notify each recipient by e-mail or receive the file them self and then distribute it by attaching it to an e-mail. All unnecessary steps.

Let Desktop Mailman™ sound the alert!

Desktop Mailman™ uses both sound and a small pop up box to notify a user anytime a document is scanned, faxed, forwarded or imported into their eCopy Desktop folder. Neatly displayed as a desktop icon in the Windows tray,

Desktop Mailman™ also provides a shortcut to launch eCopy Desktop.

**Get Desktop Mailman™  
And Get On With Work!**
